OUR STORY

THE VARILIGHT STORY

Varilight is the brand name of Doyle & Tratt Products Ltd, the leading British manufacturer of dimmer switches and decorative switches and sockets. Our diverse and innovative range is available throughout the UK and the rest of the world via the electrical trade, retail and online suppliers.

Established in 1972 manufacturing dimmer switches, Varilight naturally diversified into decorative wiring accessories. Ground breaking innovations enabled the company to pioneer new processes in forming metal plates, which have often since been imitated. Varilight continues to manufacture in the UK, enabling fast response times and the ability to fast-track product development and experiment with new materials and processes to keep the Varilight brand at the forefront of cutting edge design, and leading quality standards. Innovation in dimming technology has made Varilight world experts in lighting control. In recognition of this expertise, Doyle & Tratt Products Ltd was awarded the UK's most prestigious recognition of business achievement, The Queen's Award for Enterprise in the category of "Continuous Innovation and Development" in 2006 and again in 2015.

A clutch of industry awards have followed for Varilight, which was also the inaugural winner of the "Innovation in Lighting Design" award at 100% Design in 2007 and a "Decade of Design" finalist at the Lighting Design Awards in 2012.

Meanwhile the dimmer switch continued to evolve with the development of V-Pro intelligent dimmers, which have become the industry standard for controlling dimmable LED lighting. This market-leading technology has been applied to a wide array of LED compatible dimmer switches including remote control versions with scene setting capabilities. The company is continuing to push the boundaries of lighting control technology with the introduction of a new range of V-Com dimmer-switches capable of handling large LED loads in commercial and domestic settings.

Varilight continues to be run as a privately-owned family business with an unrivalled commitment to service and value for money and now manufactures over 5000 product lines. With its aim of holding stock of every product, Varilight's UK manufacturing capability enables it to react quickly to orders, for large project quantities. Being UK based, Varilight is also able to quote for, and manufacture special non-standard items with amazingly fast turnaround times. Just ask for Varilight's bespoke service.

The core values upon which more than 40 years of business success have been built will endure as a new generation continues to work hard to ensure that the Varilight brand remains synonymous with quality, choice, value and innovation not only in technology but also in leading the market in on-trend decorative finishes across the comprehensive Varilight range of wiring accessories.

CLASSIC

VARILIGHT FIXED RANGE

VARILIGHT VARIGRID/MODULAR RANGE

DESIGN

By choosing Varilight sockets and switches, you are choosing timeless elegance, that will never go out of style, and a style that suits any interior. A wide range of finishes from functional and stylish Brushed Steel to elegant Jubilee Brushed Brass, classic Pewter and modern Matt Black.

Thanks to the special design of the frames, they recede from the wall by only 3 millimetres, and the substance made of transparent plastic visually further reduces their thickness. Wiring accessories are offered with two ranges: Varilight fixed range and Varilight Varigrad collections.

Both offer a stylish minimalistic design and a wide range decorative finishes including Jubilee collection which is a modern interpretation of classic design. Frame edges decorated with a beaded ornament, reminiscent of the charming and graceful neoclassical style.

SWITCHES

Varilight offers a wide range of one and two-gang switches:

- *Rocker Switches*
- *Toggle switches*
- *Momentary switches*
- *Impulse (Push-On/Off) switches*
- *Dimmers*

The standard switch mechanism provides 2-point control, in addition there is a mechanism for lighting control from 3 places. So you can easily select the mechanisms that are most suitable for your project.

DIMMERS

V is for Versatile

Never before has there been such a choice of light sources for installers to choose from. We offer a comprehensive set of dimmer series to widen compatibility with this ever-growing array of lighting options.

*Best for: Filament Lighting
Features: Overload Protection (on some models)*

*Best for: LED Lighting
Up to 100W (Max. 10 dimmable LEDs)

*Best for: LED Lighting
Up to 100W (Max. 10 dimmable LEDs)
Features: Soft Start, Overload Protection,
3 Dimming Modes, Adjustable Minimum Brightness,
Remote Control, LightScene*

MEDIA

With the Varilight data and television sockets you can create any combination of products for connecting multimedia devices. High quality audio jacks allow you to connect speakers to your home cinema, and modern information connectors transmit the signal in high permission. You just have to enjoy the achieved effect.

SOCKETS

High quality electrical outlet mechanisms ensure long lasting safe work throughout the entire service life. To charge electronic devices, USB chargers are offered, made in the same design, like other products.
